“NEXT DOOR’S NEIGHBOUR”

The Teatro Experimental do Funchal – TEF débuts on April a brand new play. A four acts comedy by the Portuguese playwright André Brun, which will surely bring many good mood moments to its audiences.

“A Vizinha do lado” (Next door’s neighbour) went on stage for the first time on January 5, 1945, in Oporto Coliseum, and since then has toured throughout the Portuguese mainland, across theaters or cinemas.

This story spins around Mr. Plácido Mesquita, an Ethics Teacher at Famalicão’s High School, who arrives at the Portuguese capital, Lisbon, to visit his nephew, Edward, supposedly studying medicine. The situation becomes complicated because, apart from the fact of that Eduardo is not studying at all, he’s also living with a showgirl in musical comedies, Isabel.

It’s an everyday life story, which brings up other daily common stories that may happen to anyone and anywhere.

“Next door’s neighbour” is staged by Eduardo and Luíz and opens on April 10, in Santo-António movie-theatre, in Funchal.

Note: we regret to inform that the above play is exclusively held in Portuguese.

"Mercarte" - Municipal Garden – Funchal

Madeira Film Festival

The Madeira Film Festival is a cinema festival about nature that promotes the Region's Laurel Forest *, world heritage site recognized by UNESCO, returns this year for its 3rd edition from April 21 to 27. This cultural and educational independent event staged at the Belmond Reid's Palace and Municipal Theatre Baltazar Dias, in Funchal.

The festival includes, as in previous editions, the official film's selection, concerts, panel discussions, workshops, an educational project and a wide social programme, including gala dinners, Madeira wine cocktails -, the official drink of Madeira Film Festival, the Laurissilva Ambassador award fashion shows and vintage car's parades.

The programme is vast and diversified, offering to all of those who wish to partake, plenty of good motives to attend this year's event.

Official website: <http://madeirafilmfestival.com>

** Laurel forest, also called laurissilva, is the name given to a type of subtropical forest found in areas with high humidity and relatively stable, mild temperatures. The forest is mainly characterized by the presence of plants from the laurel family (Lauraceae) and endemic Macaronesian region formed by the archipelagos of Madeira, the Azores, the Canary Islands and Cape Verde. In Madeira, its higher presence is shown in the highlands of the island, where is located the largest and most well preserved area, recognized in 1999 by UNESCO as world heritage site, occupying a range of about 15,000 hectares.*
